

# Schedule Changes

---

Benj has graciously allowed us in MECH 162 to have a convenient time slot to take our midterm test. To accommodate this one week change in schedule certain changes have had to be made to the schedule of both classes.

## Changes to MECH 162

This is easy to describe.

Due to the fact that we are all having a test during the allocated blocks of time on Thursday morning there will be NO OTHER Lectures OR Labs in MECH 162 during this week.

That said ... read on with care.

## Changes to Benj's Class for the week of March 27<sup>th</sup> to 31<sup>st</sup>

So that Benj's Statics and Dynamics class proceeds without interruption the following changes will take place. Make sure you read and understand these changes so you don't miss any classes.

	M	T	W	Th	F
8:30			X02 AB LEC	X02 AB LEC	X02 AB LEC
9:30				X01B	
10:30					
11:30					
12:30					
3:00			X02A Plus X01B		
3:30					
4:00					
4:30					

**Section X02:** You will take your test on Thursday morning at 8:30. Recall that is the time you normally have a lecture with Benj. On the schedule above you can see that we have done a swap with Benj for lecture times and will now take Benj's lecture on Wednesday and Friday mornings in the same room that you would normally have lectures with Tariq.

**Section X01B:** As you normally have a lab/tutorial with Benj on Thursday mornings at 10:30 we wouldn't want you to miss out. Your lab, with Benj has been moved to Wednesday afternoon during the time you normally have a lab with Ryan. Its in the same room too.

**Section X02A:** Your Thursday afternoon lab with Benj will now be held in TEC 110.
