

# me263 – Fluids & Heat Transfer

---

What data should I have in paper form for the midterm?

[fluid dynamics: supplementary data](#)

[recommended velocities](#)

Pipe size data **will be provided**

What every you need to remember how to work through a **Class I flow** problem

What every you need to remember how to work through a **Class II flow** problem

What every you need to remember how to work through a **Class III flow** problem

What every you need to remember how to work through an intake design (NPSH)

- Vapour pressure information **will be provided**

A Moody diagram **will be provided**

[Introduction to Heat Transfer](#)

[finned surface heat transfer](#)
